

# Assignment 1

**Yash R. Ramteke**  
**bt21btech11006**

**Q10 - a) :** Use graph paper for this question. The marks obtained by 120 students in an English test are given below:

Marks	0-10	10-20	20-30	30-40	40-50	50-60	60-70	70-80	80-90	90-100
No. of students	5	9	16	22	26	18	11	6	4	3

C.I	Marks less than	No. of students	C.F.
0-10	10	5	5
10-20	20	9	14
20-30	30	16	30
30-40	40	22	52
40-50	50	26	78
50-60	60	18	96
60-70	70	11	107
70-80	80	6	113
80-90	90	4	117
90-100	100	3	120

Draw the ogive and hence, estimate:

- the median marks.
- the number of students who did not pass the test if the pass percentage was 50
- the upper quartile marks.

**Solution:**

No. of students = 120

Median = 60th term through cumulative marks, draw a line parallel to x-axis and then draw perpendicular line to x-axis from where it touches curve.

As per the graph:

**i) Median = 42**

**ii) Passing marks = 50**

Draw a line parallel to y-axis and perpendicular line to y-axis from where it touches curve.

**No. of students who did not pass = 78**

**iii) Upper quartile marks:**  $\frac{3}{4} \times n^{th} \text{ term}$   
 $= \frac{3}{4} \times 120 = 90^{th} \text{ term}$

Draw a line parallel to x-axis and perpendicular line to x-axis from where it touches curve.

**Upper quartile marks: 57**
